### PROFESSIONAL SUMMARY

A specialized IT and Data Management Professional, currently a 2nd-year Software Engineering student at the University of Aleppo. I was ranked 1st in my graduating class at the Technical Institute of Computer Technology. I possess advanced skills in MS Office automation and database management. As an active member of the Student Service Programming Team, I bring a logical approach to problem-solving and a proven ability to work in trilingual, high-pressure humanitarian environments.

### TECHNICAL SKILLS

Advanced MS Office Suite:

- Excel: Expertise in Pivot Tables, complex formulas, and task automation (Macros/VBA) for comprehensive statistical and financial data analysis.
- Word & PowerPoint: High proficiency in drafting technical donor-facing reports and creating professional high-impact presentations.

IT & Information Management (IM):

- Mobile Data Collection: Expert design of digital surveys and field data collection tools using KoboToolbox and ODK.
- Database Management: Proficient in SQL for database administration, ensuring the quality, integrity, and security of beneficiary data.
- IT Support: Comprehensive technical support, hardware maintenance, and local office network (LAN) management.

Software Development:

- Web Frameworks: Developing custom software solutions to streamline administrative workflows using Django, Laravel.
- Certifications: ICDL (International Computer Driving License) – Certified with Excellent Grade.

### PROFESSIONAL EXPERIENCE & ACTIVITIES

Member of the Student Service Programming Team | Faculty of Informatics, University of Aleppo 2025 – Present

- Participating in the development of software solutions and technical tools designed to facilitate access to academic information and automate student services.
- Providing technical support to peers and contributing to the creation of an advanced digital learning environment within the faculty.

Freelance IT Specialist 2022 – Present

- Designed custom automation solutions using Advanced Excel, enhancing administrative efficiency and reducing report generation time by 40%.
- Built and managed local SQL databases for digital archiving and tracking technical operations.

### EDUCATION

- B.Sc. in Informatics Engineering (Software Engineering) – University of Aleppo (2nd Year).
- Associate Degree in Software Engineering – Technical Institute (Ranked 1st).
- ICDL Certified – Excellent Grade.

### LANGUAGES

- Kurdish: Native.
- Arabic: Full Professional Proficiency (Secondary Language).
- English: Professional Working Proficiency (Technical Terminology & Correspondence).
